

Super senses

Record sheet

Name: _____ Team: _____

At each station, try the activity, then answer the question here.

A Skin like sandpaper

Which way does shark skin feel rough, and why?

B A skeleton that bends

Why do scientists mostly find shark teeth, not whole skeletons, as fossils?

C The electric sense

How does the electric sense help a shark find food it can't see?

D Feeling the water move

When would the lateral line be more useful than eyes?

E Eyes for the dark

Why is it useful for a shark to see well in dim light?

F Teeth on a conveyor belt

What does a tiger shark's tooth tell you about what it eats?

Which shark super sense would you most like to have, and why?
